DIGITAL  
TRANSFORMATION

## ABOUT CiTD

CiTD is a leader in the Digital Transformation sector with more than 20 years of experience in the marketplace. Our solutions cover the whole project lifecycle, from preliminary consulting to detail design, operation, and maintenance of civil infrastructure and industrial facilities.

CiTD is in continuous evolution in the development of technological tools and innovative solutions to increase the value of the engineering services provided to our clients and also to increase our commitment to the environment.

**Our Vision** is that modern Engineering Design will be driven by Artificial Intelligence (AI) and Internet of Things (IOT).

**Our Mission** is to contribute through our passion and experience to the success of our clients' projects in terms of time and quality and to reach operational excellence by lowering overall costs and creating competitive advantages for them.

## WHAT WE DO

### BIM/GIS

We have experience executing the different phases of BIM/GIS Projects supported by cutting edge technology.

We mainly work in BIM environments and use Agile methodologies.

### SMART CITY TOOLS

We help our clients to make better decisions through the development and implementation of new technologies.

Our intelligent tools improve quality of life in the cities and reduce operation cost and environmental impact.

### INDUSTRY 4.0

Smart Factory solutions as digital twins and virtual simulations of physical assets that allow our clients to optimize their design, manufacturing, and operation & maintenance processes and also increase safety and reliability.

# DIGITAL TRANSFORMATION

The importance of Digitalization in the current industrial environment is clear. Companies need to look at Projects in a much different way to what they have done in the past.

Access to robust digital models allows them to manage design, construction, and operation issues in a more effective way. The number of advantages justifies by far the investment in this type of Project approach.

## WHY US

Our team is formed by Aeronautical and Mechanical Engineers, Architects, Computer and Facility Experts, and Industrial Designers with a large experience in infrastructure, industrial facilities, and digitalization projects in the aerospace sector.

In CiTD we are flexible, efficient, and open to constant change. Our internal organization and partnerships with third parties allow us to deliver well-planned, on-time, and on-budget solutions to our clients.

“CiTD is your partner of choice for Digital Transformation”
